

Tumor Cell Line

Tumor cell lines are excellent *in vitro* models used in many biomedical research laboratories to study the biology of cancer, development and testing of anticancer drugs and development of new therapies.

Creative Bioarray's tumor cell line collection consists of over 1,000 different human cell lines, covering 82 different types of tumors. In addition to over 1,000 human tumor cell lines, many different types of animal tumor cell lines are also available.

Key Features

- ◆ Cell lines of human origin are authenticated by STR analysis.
- ◆ Cell lines of animal origin are authenticated by species-specific PCR.
- ◆ All cell lines are tested as mycoplasma, bacteria and virus negative.
- ◆ We offer next-working-day delivery.

Most Popular Tumor Cell Lines

Cat No.	Product Name	Species	Cell Type	Culture Properties
CSC-C0233	L-540	Human	Leukemia/Lymphoma/Myeloma Cells	Suspension
